

Handout #5

Nathan's cognitive goals and objectives

Child: Nathan

Cognitive Goals and Objectives:

Cognitive Goal #1

Year Long Cognitive Goal:

Nathan will increase his cognitive skills.

Objective:

Nathan will identify letters

Criteria:

Each letter, 3 out of 4 opportunities

Cognitive Goal #2

Year Long Cognitive Goal:

Nathan will increase his cognitive skills within classroom activities as measured by the following objectives:

Objective:

Nathan will identify the letters in his name using capitol letters after being presented with them (i.e., written on paper, on a name tag, in letter puzzles, on letter flash cards, or in a computer game) and asked "Nathan, what letter is this?"

Criteria:

Nathan will correctly respond when asked a direct question of "Nathan, what letter is this?" 10 out of 10 trials for each different letter in his name: N, A, T and H over 3 data collection periods.

Cognitive Goal #3

Year Long Cognitive Goal: Nathan will increase cognitive skills in the classroom.

Objective:

Nathan will identify each letter of the alphabet by verbally telling a teacher whenever he sees one.

Criteria:

100% on each letter, each day, over 3 months.
